

Jaguar XJS 4.0 Convertible

A lovely XJS Cabrio finished in an attractive shade of Sapphire Blue with a complementing cream leather interior and navy blue roof, this later facelifted example, being powered by improved 4.0 litre version of the AJ16 engine, that has had much care and attention lavished on it in the recent past

The coachwork was refinished in 2016 to a good standard which holds today, the convertible roof was replaced in 2018, and other items attended to as and when required. Having covered very few miles in recent years as part of a small collection, the XJS has just been recommissioned . The car has an MoT certificate to February 2024.

A recent major service including fluids replacement battery and alternator, and attention to the front brakes, comprising new calipers and discs to the front. Additionally the crank sensor has recently been replaced and the tyres are only a few hundred miles old.

The history file includes the original book pack, a comprehensively stamped service record, previous MoT test certificate, also some invoices, receipts and

photographs over the years.

The electric hood works as does the cruise control. The cream leather driving and passenger seat show patina as does the wood in places and this is reflected in sensible pricing.

Service history:

9800 miles

22210 miles

30719 miles

31360 miles

38417 miles

47692 miles
